## DETAILED ACTION

### *Specification*

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Please update the status of the related applications mentioned in the specification

### *Claim Objections*

2. Claims 1-8, 11, 12, 14 and 15 are objected to because of the following informalities:

Claim 1, line 5, "during" is mistyped as "curing". In addition, the claim recites in step a "the set of path memory symbols" are based on "the current input sample". However step b recites the **reverse** for the next cycle path and next cycle input. More specifically, step b recites "select ... as the **next cycle input sample** based on ... the **next cycle path memory**".

The same comment applies to claims 2-8.

A goal is set forth in the preamble of claim 11 for "a multiple decision feedback equalizer". However, the body of the claim, other than "plural output", does not recite any element related to the equalizer. Certainly, a plural output lines do not in any way form an equalizer. The same comment applies to claims 12, 14 and 15.

Appropriate correction is required.

***Allowable Subject Matter***

Claims 1-8 are allowed.

***Conclusion***

This application is in condition for allowance except for the formal matters noted above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Claim 1-8,11-12, 14 and 15 would be allowable if amended to overcome the objection set forth above.
